

Stormtech Pty Ltd

COMPANY OVERVIEW

Stormtech is a specialist stainless steel fabrication, with capacity to process 20t of stainless steel per month from sheet/coil/profile and tube to finished product, and deliver both nationally and internationally.

Stormtech is an award winning and innovative company and is a world leader in the production grates and drains used in sanitary and civil drainage, from aircraft handling areas to showers.

Most advanced technology has been developed in house with our own engineering, design, compliance, and trade skilled staff.

Stormtech products are carried worldwide by renowned retail suppliers such as Reece, Harvey Norman and Tradelink.

Stormtech is regionally based and employees are recruited locally, primarily in the Nowra NSW fabrication facility.

We employ a diverse workforce - Over 25% women, former refugees, veterans and skilled migrants. The company is dedicated to upskilling the workforce and maintains 6 apprenticeship positions, and a total workforce of 65 permanent employees.

CAPABILITY

- Manufacturing, primarily stainless steel sheet metal. 20t per month average capacity.
- CNC Turret punch, latest generation machine & current software (Amada AE2510, 270x2500mm travel without repositioning)
- CNC press brake, latest generation machine & current software (Amada HG1303)
- Software integration of Solidworks/Driveworks/ Production Designer for automating CAD programming.
- Latest Fronius MIG/TIG equipment including Cold Metal Transfer welding
- 4 head Multicam CNC router 6x1.2m
