Vinnies good works

Key Markets

- Volunteer organisations

- Medical devices and services
- Global freight management
 - Multiple pilot programs been run across various other industries on a local and global scale (Oceania, Asia and USA).

Capabilities

- Pentalym is a software platform designed to maximise supply chain capabilities
- The system allows you to create a mirror of the real world functionality of any physical object cost effectively and in scale
- As a 24/7 Inventory Tracker it drives efficiency through all aspects of supply chain
- Utilising live data enables its users to pinpoint weaknesses and areas for improvement
- Implementation of this software greatly improves accuracy, minimizes waste and reduce costs, resulting in safer and more sustainable supply chains.

Standards & Accreditations

- SSAE 16 SOC 2 Type II
- ISAE 3402, ISO 27001/27002.

Discriminators

- Inexpensive and scalable cloud based software available anytime anywhere
- Live global tracking and data retrieval creating real time visibility down to an asset level
- Enables secure issue and maintenance of a unique asset (non-fungible identifiers) that can be configured and accessed by relevant personnel
- Independent platform access includes traditional barcode, QR code, RFID and Bluetooth
- Creation of audit record for individual physical items, demand forecasting and supply chain optimization activities can be automated.
